Durban is a flooring specialist company providing a one stop turnkey solution for durable, low maintenance flooring solutions.

Durban's greatest strength is its focused R&D, highly skilled experienced staff. It's all India reach with application teams in all major cities, which enables clients to get service in time.

**MISSION :** Durban's strategy focuses on solutions to help their customers build a better world and become a powerhouse in innovation.

**VISION:** To shine bright in the years ahead by including new product development, sources and strategies and larger client bases for a sustainable future.

### OUR CORE COMPETENCY

- ✓ Industrial Flooring (Epoxy, PU, EPU)
- ✓ ESD Antistatic FLOORING
- ✓ PU Concrete
- ✓ Repairs for concrete
- ✓ Water proofing's

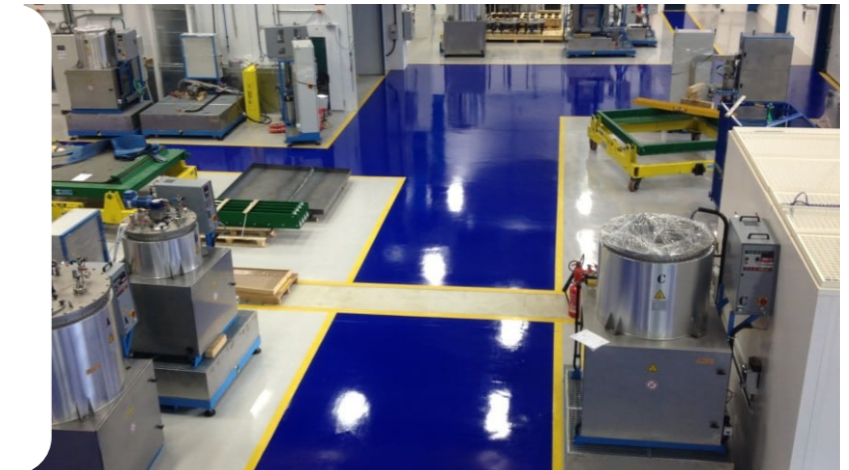

### PRIMERS

- ✓ Low viscosity primers for new and old concrete floors
- ✓ Oily Floors
- ✓ Damp Concrete(green concrete)
- ✓ Highly corrosive surfaces
- ✓ Metal Structures

### SCREED / BASE COAT

Epoxy based solvent free 3 component screed system designed for Application in Automobile, Engineering Chemical, Steel, Pharma floors.

#### Advantages

High Compression | Mechanical Strength Very good impact resistance  
High abrasion resistance.

### TOP COAT SELF LEVELING

Epoxy / EPU based solvent free 4 component Top Coat System designed for Application in Automobile, Engineering, Chemical, Steel, Textile, Food and Pharma Floors.

#### Advantages

Self Leveling | High Compression and Mechanical Strength | Very good impact resistance  
High Gloss

### TOP COAT ROLLER COATING

PU, Solvent as well as water based top coating system designed for application in Automobile Engineering, Chemical, Steel, Textile, Food and Pharma Floors.

*PU Concrete | PU Roller Coat*

#### Advantages

Fast Completion Cycle | Economical | High Abrasion Resistance | Semi Gloss – Less Scratches

## PU CONCRETE

Polyurethane concrete floors which are tough than epoxy & which are proven to withstand THERMAL SHOCKS.

### Advantages

Excellent abrasion resistant | Excellent chemical resistant | Ability to handle extreme hot & cold temperature -40 degree to +130 degree.

## CONCRETE REPAIRS & MAINTAINENCE

Epoxy based specially formulated repair material for cracks, joints, potholes and damaged concrete surfaces.

### Advantages

Excellent bonding to concrete | Fast setting | Very high Mechanical & Compression Strength

## ESD ANTISTATIC EPOXY FLOORING

A range of antistatic flooring products that has successfully proven to prevent harmful electrical charge build up from destroying sensitive components by dissipating the charge safely to the ground. Company name makes available both conductive and static dissipative flooring systems.

### Advantages

Electrostatically conductive | High chemical resistant | Hard Wearing Resistance | Good Abrasion resistant

## Our Success Partners

### AUTOMOBILE

### AUTO COMPONENTS / ENGINEERING & TYRE INDUSTRIES / GENERAL INDUSTRIES

### ELECTRONICS / ELECTRICALS

### PHARMA / FOOD / PAPER & TEXTILES
